**Jacques Diederik**

to me

David,

Attached you can find my review.

I can also make following additional suggestions outside the official review:

- Recently, a few papers related to deep disposal has been accepted in the accepted and proofs are ready, so it should appear quite fast on Computation
- Line 55: I think one reference to the HP1 code would fits in here.
- Line 63: In the SeS-Benchmarks, also one paper is recently accepted foll COMSOL. As above, proofs are ready and they should appear quite fast on li

If you want full reference of any of these suggestions, please let me know,

Best Regard
